

Sugar Customer Journey Plug-In

Unify CRM Best Practices with the Customer Experience

Customer experience has never been more important to business success. Now there's an exciting new way to make CRM the engine that drives a better, more seamless customer experience.

Customers today say that 70% of their buying decisions are based on how they feel they're being treated. 86% of customers say they're willing to pay more for a better experience, and 65% of customers say they leave brands that fail to meet their expectations for customer service.¹ What are businesses doing in response? Remarkably, 80% of CEOs believe they deliver a superior customer experience, but only 8% of their customers agree.²

The Sugar Customer Journey Plug-In enables organizations to close this gap by capturing each customer journey and operationalizing every step of the journey, tightly integrating it with their Sugar deployment. This alignment of company operations with the customer's perspective enables organizations to create extraordinary relationships — delivering more seamless, satisfying customer experiences and increasing business efficiency across the entire lifetime of their relationship with each customer.

ORCHESTRATE CUSTOMER EXPERIENCES

With the Sugar Customer Journey Plug-In, companies can define customer journeys that are specific to their business. These journeys can span the entirety of the customer lifecycle or focus on a particular segment of the relationship. Journeys can describe short-lived engagements or they may represent longer duration or even cyclical lifecycles. The Sugar solution includes industry-specific customer journey templates that companies can use to define the journeys that are most applicable to their business quickly.

¹ Customers Report 2020

² Bain and Company Customer-Led Growth Report

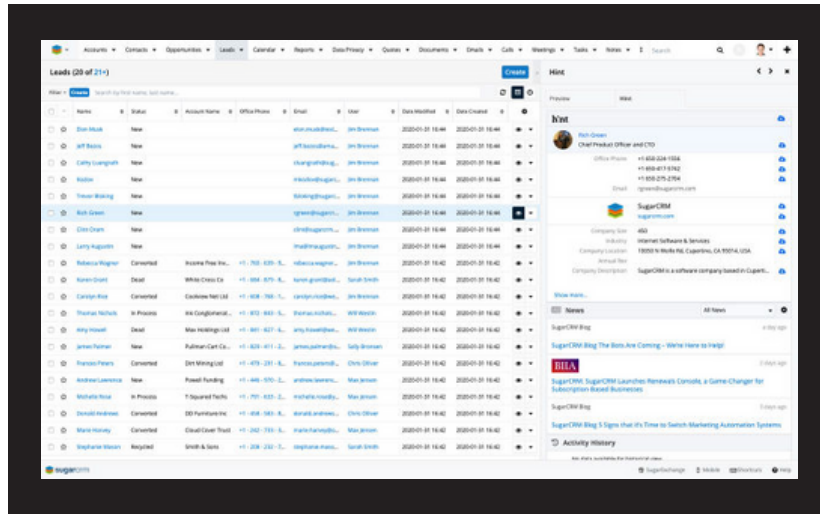

In Sugar, a customer journey can be applied to any object such as contacts, leads, accounts or even custom modules. Each customer journey is defined as a series of stages, with each stage built from a progression of activities.

Activities in the customer journey are modeled as native Sugar tasks, calls or meetings. Tying activities and business processes to a customer journey model enables companies to deliver more seamless customer experiences by providing insight to employees into where customers are in every stage of their journey and clearly indicating their needs and expectations at any point in time.

INCREASE BUSINESS EFFICIENCY

The Sugar Customer Journey Plug-In increases efficiency by enabling businesses to focus employee actions on the needs of the customer at any point in time, keeping the customer perspective at the forefront of their thinking. Operationalizing the map in Sugar helps ensure everyone clearly understands what needs to happen at each step along the way to advance the relationship.

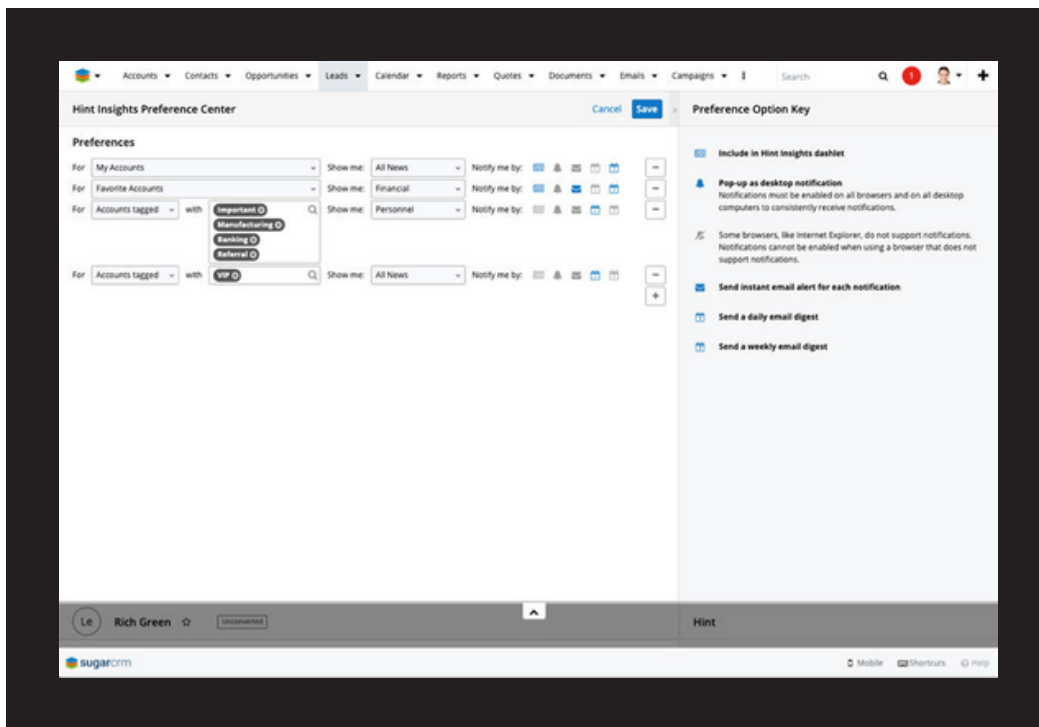

Consistently following an optimized customer journey model can increase the value of leads, opportunities and accounts. Leads are more likely to convert to prospects and opportunities when journeys are tracked, and consistent care is taken to educate and nurture individuals through each step. It's also important for organizations to customize business processes and treatments for different kinds of leads, since all leads are not created equal. The same principle applies to opportunities, accounts, cases and other activities as individuals work on to improving customer retention, expansion, cross-sell, upsell, and customer advocacy.

With limited resources, companies need to not only prioritize customer engagements, but also define the best ways to engage with different customers. The Sugar Customer Journey Plug-In enables organizations to define roadmaps to success and measure progress at every step of the way.

BHEA

With the Sugar Customer Journey Plug-In, everyone understands where the customer is and what are the next best steps at every stage of the journey. Defining optimal customer journeys and using Sugar to operationalize them helps turn sales success and customer satisfaction into repeatable processes.

By tying the customer journey to SugarBPM, Sugar users can automate the execution of activities in each customer's journey. Journey activities can automatically trigger workflows and tasks, assigning these activities to the right individuals. This makes Sugar a powerful engine to guide customers and coordinate employees through the entire customer journey.

About SugarCRM

SugarCRM is a customer experience leader enabling businesses to create profitable customer relationships by delivering highly relevant, personalized experiences throughout the customer journey. We empower companies to strengthen existing customer relationships, create new ones through actionable insights and intelligent automation and better understand the customer at every stage of the journey. This enables businesses to accelerate demand generation, grow revenue, deliver superior customer care and increase loyalty. Our easy-to-use, intuitive platform makes customer experience easy and accessible for everyone, allowing marketing, sales and services professionals to focus on high-impact, value-adding activities that create customers for life.
